NON-GAAP FINANCIAL MEASURES

Certain statements in this report contain non-GAAP financial measures. GAAP refers to generally accepted accounting principles in the United States. A “non-GAAP financial measure” is a numerical measure of a company’s historical or future financial performance, financial position or cash flows that excludes amounts, or is subject to adjustments that have the effect of excluding amounts, that are included in the most directly comparable measure calculated and presented in accordance with GAAP in the statement of operations, balance sheet or statement of cash flows of the company; or includes amounts, or is subject to adjustments that have the effect of including amounts, that are excluded from the most directly comparable measure so calculated and presented. Operating and statistical measures are not non-GAAP financial measures.

Brunswick’s management believes that non-GAAP financial measures and the information that they provide are useful to investors because they permit investors to view our performance using the same tools that we use and to better evaluate our ongoing business performance. Diluted earnings per common share, as adjusted, refers to diluted earnings (loss) per common share from continuing operations, excluding the earnings per share impact of pension settlement charges, restructuring, exit, integration and impairment charges, impairment charges for an equity method investment, loss on early extinguishment of debt, special tax items and the results of discontinued operations. Adjusted operating earnings refers to operating earnings, excluding the earnings impact of pension settlement charges and restructuring, exit, integration and impairment

charges. Adjusted pretax earnings refers to earnings (loss) before income taxes, excluding the earnings impact of pension settlement charges, restructuring, exit, integration and impairment charges, impairment charges for an equity method investment and the loss on early extinguishment of debt.

Free cash flow refers to cash flow from operating and investing activities (excluding cash provided by or used for acquisitions, investments, reductions in or transfers to restricted cash, purchases or sales/maturities of marketable securities and other investing activities). Percentage changes in net sales expressed in constant currency are presented to reflect the impact that changes in currency exchange rates had on net sales. To present this information, net sales transacted in currencies other than U.S. dollars are translated to U.S. dollars using 2015 exchange rates for the comparative period, using the average exchange rates in effect during that period.
